

## CST EXAM PREP AND REVIEW WORKSHOP

This course is designed to prepare Surgical Technologists to take the CST exam and to demonstrate clinical competence and knowledge of practice standards.

### COURSE BENEFITS:

You will learn strategies to help you feel less intimidated. Some simple tricks will help you identify the most likely answer to multiple choice questions even before you consider the content. You will leave with a personal study plan and take five practice tests over the one day course that will help boost your confidence.

This is a straight forward approach to the specific information you will need to successfully complete the CST exam. The content is based on AST recommended standards of practice. This very full day of information is presented in a relaxed, professional atmosphere, delivered with humor and real life events that help you to relate the Recommended Practices to your own practice. You will retain the information for the exam and for years to come.
