

CNOR EXAM PREP AND REVIEW WORKSHOP

This two day course is designed to prepare perioperative nurses to take the CNOR exam and to demonstrate clinical competence and knowledge of practice standards.

COURSE BENEFITS:

The one thing that we are most proud to deliver as a part of this class is our personalized study plan. You'll leave this class having learned exactly how the writers of the exam go about creating the questions, where they go to source their information, and how YOU personally can best use that knowledge to study. In addition, you'll have taken seven tests over the two days of class that reflect the content and style of the exam to better give you a feel for what it's like to apply these skills in practice. After you attend, you'll have access to a recording of the class for 120 days and an additional 200 practice questions to help you prepare for the exam. If at any point you need any more help, do not hesitate to call or email!

The CNOR exam is a perioperative exam, covering pre-operative, intraoperative, and postoperative nursing. Since many nurses specialize in only one of these areas, it is vital to understand the rationale behind the entire perioperative nursing process from start to finish. We will discuss several topics over the two days of class; all aspects of sterilization the safe administration of anesthesia, the nurse's role as a patient advocate, and the professional nurse's responsibilities both ethical and legal, all from the perspective of the perioperative nurse. The discussion of each topic that we present is carefully and consistently tailored to reflect the most up to date version of the exam. This class will help you develop not only the understanding that you will need to pass the exam, but also develop confidence and clinical competence in your own nursing practice.

I hope to see you in class.
